

# TUG STRAP - UNIVERSAL

## INSTALLATION GUIDE

SKU: 6501B - 06501R

**\*\* IMPORTANT \*\***  
**MOUNTING POSITION**

If you intend to use the Tug Strap for towing, it must be mounted in a flat orientation like the picture below where the mount is parallel with the strap.

## **INSTALLATION GUIDE**

1 Each vehicle will have a unique mounting condition depending on how you plan on using the Tug Strap:

### **FUNCTIONAL TOW MOUNTING**

If you plan on using the Tug Strap for towing, the mount must be parallel with the strap. It is critical to find a suitable structural element of the vehicle that you can mount the Tug Strap to.

### **NON-FUNCTIONAL TOW MOUNTING**

If you bought the Tug Strap purely for style, you can mount the Tug Strap where ever you prefer.

2 Drill a 17/32" hole in your mounting location and bolt the Tug Strap in place.

3 If you are able to pass your Tug Strap through your bumper and would like to cut a slot for the Tug Strap to pass through, follow the steps outlined in the [Bumper Slot Guide](#).

If not, your installation is done, enjoy the drive!

*\*\* Please note that these instructions are for a tow hook cover but the same steps can be used to slot your bumper. \*\**
